I. Finding a proxy

You need a strong proxy/vpn for this, I personally use <http://www.proxpn.com/>
But any proxy/vpn is fine. This eBook will be based off this proxy so I suggest you use this one.
Now go to options Remove Scripts make sure that is unpicked.

II. Going to the site

Cool, now you're at the proxy(if you use a vpn, skip this step) webpage type in <http://www.1und1.de> and click "GO"

Great you're at the site! Click this where it says Domain-Angebote on the website (should contain domains and prices) Now click where it says this: > Weitere Domainendungen And check all the boxes

III. Finding the details

All you have to do is go to www.google.com and search the following:
"post bank blz konto" make sure you go to like page 10 or 11.

You will find a lot of numbers in the descriptions of the links. Keep that page open then go to <http://www.fakenamegenerator.com> and set 'Gender' as male 'Name Set' as German, And Country as Germany
Click 'Generate' Save the Phone number, The full name, and the addresses.

Good, you now have the information! Now you need to start the purchase!

IV. Starting the purchase

Great! You have all the information you need now go back to 1und1 and check the domain you want. Or if you want all or multiple check them as well. Click Prüfen. Now see which domains are available if their status is "Ist frei" they are available check mark the ones you want. Click 'weiter'. You have to choose which pack you want. The third pack comes with a host and domain name. Click 'weiter' on the package you want. Scroll the page down and press 'weiter' Now in the next page give the info you saved from FakeNameGenerator, and your gmail email address(the confirmation goes there (a gmail address because it doesnt support hotmail) Now we have to find the Blz konto. Go back to the google search and go to page 10-15 and find a Blz konto. If the blz konto is in this form 123 445-65 , you need to post it like this 12344565. Once you put in the Blz konto click 'weiter'. Now enter a password for your domain(s). Enter the password again. Accept the TOS and press Bestellen.

V. Finishing a free purchase.

The next screen should mean that your done!!

Note: It may take up to 72 hours to activate your domains, just keep checking your email. If it doesn't go through, that means you have a bad blz konto
